# PSoC Designer: PSoC1 开发环境

The screenshot shows the PSoC Designer 5.0 environment. The main workspace displays a detailed circuit diagram for a fan control system, featuring multiple PWM modules (PWM\_12 to PWM\_15), ADCs (ADC\_0 to ADC\_3), and DACs (DAC\_0 to DAC\_3). The interface includes a menu bar (File, Edit, View, Project, Interconnect, Build, Debug, Program, Tools, Window, Help), a toolbar, and several panels: 'Global Resources' on the left, 'Device Resource Meter' showing digital and analog block usage, 'Workspace Explorer' on the right showing the project structure, and 'Properties - ADC' at the bottom right. A 'Quick Start' window is open at the bottom left, displaying an ADC block diagram with an input, a Data Clock, and a Decimator.

GET YOUR ENTRIES IN! CYPRESS'S \$160,000 DESIGN COMPETITION WRAPS UP MAY 30

Cypress's \$160,000 global design competition is in full swing. With the May 30 deadline looming, now is the time to submit your entry. The contest enables students who design with Cypress technology to compete regionally for Cypress Innovation awards of up to \$20,000 in cash and ultimately win the T.J. Rodgers Trophy, named after Cypress's president and CEO.

Contest entries are being solicited from six regions: (1) North America, (2) Europe and the Middle East, (3) China, (4) Japan and Korea, (5) India, and (6) Southeast Asia and ROW (rest of world). Each region will have a first-place prize of \$10,000, a second-place prize of \$2,500, and a \$1,000 third-place prize. The professors of the first-place prize winners in each region will also receive a \$10,000 award. In addition, all first-prize winners will compete for the inaugural T.J. Rodgers Innovation trophy and an additional \$10,000 cash prize. Click [here](#) to read more...
